

**To: Whom it may concern**

October 18<sup>th</sup> , 2007

**CERTIFICATE.**

Products concerned:

**SCS1201**

**SCS1202**

**SCS1203**

The products mentioned above, manufactured by Momentive Performance Materials, are formulated to comply with the following FDA regulations:

21CFR177.2600

Rubber articles intended for repeated use.

21CFR175.105

Adhesives (NOT: SCS1203)

21CFR175.300

Resinous and polymeric coatings (NOT: SCS1203)

The products can safely be used in producing, manufacturing, packing, processing, treating or holding food when manufactured and formulated as prescribed as prescribed by Momentive Performance Materials.

Please note however that, in the perspective of these regulations, the fabricator must verify that the finished articles comply with the extractive requirements for the specific application. The products must be allowed to cure fully and surfaces should be thoroughly cleansed prior to its first use in contact with food.

The products are sold for industrial use only. Prior to use for any application other than an industrial use, the manufacturer has the sole responsibility for determining the suitability of the product for any such application. Silicone rubber products are not designed for long term implantation (> 29 days) into the human body.

I trust this information is useful to you. Please do not hesitate to contact us if you have any further questions concerning the subject.

Best regards,

F.N.C. Schlössels
